Old garage site pros and cons

PROS	CONS
Central location Town owned Out of flood plain Utilities in place Close to designated emergency Shelter	Small lot Difficult to co-locate Topography Possibly have to move buildings

As we discussed at our last meeting, a central location for the main fire station is a critical component to the function of a volunteer fire department. This was discussed to great lengths with the Breadloaf Company and is one of the reasons that the old garage site was chosen as the only viable site to build a new fire station on.

Kenneth March.
