Meeting called to order at 5:05 pm

1. Visitors, Public Comments, Changes to agenda
2. Flood and Fluvial Erosion Ordinance Discussion and Review
An overview of the ordinance was given. A lot of the document is state regulated and has been updated to current requirements. The River Corridor was added. The accuracy of the river corridor map was discussed. There is a slight financial benefit if there is a federally declared disaster. Duncan feels that properties that have been through 3 major floods and have not been impacted should not now be impacted by the river corridor. He also commented that there is much material in the rivers from roads that are forcing the rivers to meander in other directions, and the town should be allowed to remove material and put in boulders as Bennington did after Irene. Carvajal said that if the town submitted a proposal to do such a project to ANR, it could be looked at.
3. Other business
