Presentation/Public Update

Public welcome to all meetings. Scheduled every 2nd Thursday of the month at 2pm and every 4th Thursday of the month at 6pm. Thank you to John Lazelle who made the Facebook page and advertised today's meeting.

Review project background and timeline. Review Design Progress. Chuck shows current architectural renderings of each side of building. Shares that all design renderings and committee documents can be found by looking at Town website and the committee's dropbox. Presented challenges of site and need to relocate or demolish CC Haynes Hall and Allen building.

The committee has taken public feedback into account: Some felt it was too big and expensive of a building, so size was scaled down as much as possible, reducing costs. Others felt that the town needed to have a designated green space, and some greenspace was incorporated as part of the design.

Discussion on services not covered by the architects and the committee's effort to include them in the total cost of the building. This includes security and alarm systems, internet setup and dispatch services. Mike Eldred questions the flat roof. Chuck shares that the longevity of the roof has to do with materials used, not necessarily the pitch. Having a gabled roof would make building more expensive, as it would require more materials.

Nikki Steel – appreciates work done. Suggests using windows on town hall to illustrate 3D renderings. Jessica will post presentation to one of the links – can go to town website and get the link to recording from tonight.

Motion to adjourn @ 6:53 PM
