In determining conformity with zoning requirements, the burden of proof shall fall on the applicant, property owner, and/or all successors and assigns.

The Development Review Board's role is to apply the provisions of this Zoning Ordinance. All Uses and Districts as well as Standards shall be applied. In the case of standards specific to a certain type of use, the use specific standard shall take precedence over any standard for other types of uses. In the case of conflicting provisions, the standard for the specific use shall apply.

Board approval or disapproval shall be based on its judgment regarding the overall compatibility of the proposed project with the provisions of this Ordinance. The Development Review Board may attach such Conditions to a decision that it deems necessary to meet the standards and criteria of the Zoning Ordinance.

Within 120 days of an application being deemed complete, the Development Review Board shall notice and warn a hearing on the application.

Pursuant to 24 V.S.A. § 4464(b)(1), the Development Review Board shall, within 45 days of closing the public hearing, approve, approve with modifications, or deny such plans. Failure of the Development Review Board to issue a decision within this period shall be deemed approved and shall be effective on the 46th day. A deemed approval after the 46th day shall become effective only after the applicant petitions and receives approval from the Environmental Division of the Supreme Court.

Development Review Board written decisions shall address the requirements of the Districts and uses (Article IV) and Standards (Article VII) of the Zoning Ordinance as well as the Site Plan and Design Guidelines (Appendix I). In addition, findings shall address such other provisions as may be applicable from the Zoning Ordinance, including but not limited to:

- C. Article VI Flood Hazard Area
- D. Article VIII Signs
- E. Article IX Telecommunications

For projects not involving complex State or Federal permitting, Development Review Board decisions shall expire after no more than twenty-four (24) months from the date of issuance. For projects involving complex State or Federal permitting, the Development Review Board decision shall expire after no more than forty-eight (48) months after date of issuance.

The Zoning Permit issued by the Zoning Administrator as a result of a Development Review Board approval shall expire on the same date as the Development Review Board decision expires.

If all authorized activities are not substantially and nearly fully completed, as determined by the Zoning Administrator, prior to the expiration date of the Development Review Board decision and Zoning Permit, the applicant may request an administrative extension from the Zoning Administrator. If no

administrative extension is received from the Zoning Administrator, the Permit shall be deemed expired, and a new hearing shall be required from the Development Review Board.

All changes substantially completed (as determined by the Zoning Administrator) prior to the expiration date and in conformity with the Development Review Board Decision will be considered legal and conforming to this Ordinance. Development not determined to be substantially completed on the expiration date shall cease until an extension is issued by the Zoning Administrator or a new Development Review Board hearing is held, and decision is issued.

Land Development occurring without a valid Permit, including an expired Permit, without an approved extension are subject to Penalties as defined in this Article. (See § 215-216)

Section 227: Plan Changes after Receiving a Development Review Board Decision

- A. Any substantial alteration or material change (as determined by the Zoning Administrator) to a plan approved by the Development Review Board shall require re-application and review by the Development Review Board. Substantial alteration or material change means any change to a Permitted development plan approved by the Development Review Board which may have a significant adverse impact on any finding, conclusion, term or condition of the project's Permit or which may result in significant adverse impact with respect to any zoning criteria. This includes but is not limited to site plan and design changes.
- B. For minor, non-substantial changes (as determined by the Zoning Administrator) not involving substantial change in a site plan, design, or other change to a Conditional Use previously addressed in a decision of the Development Review Board, the Zoning Administrator may issue a Zoning Permit under Article II Administrative Approvals authority. The Zoning Administrator shall report all such administrative approval Amendments to the Development Review Board.

Section 228: State and federal Permits and Development Review Board Decisions

- A. Any Land Development, construction, reconstruction, or use subject to Act 250 pursuant to 10 V.S.A. §151 shall be subject to the decisions of the Act 250 review and Permit process with regards to issues of:

 - 4. Soil erosion and soil water absorption
 - 5. Impact on highway, transportation, transit networks and services
 - 6. Burden on educational facilities
 - 7. Burden on municipal and governmental services
 - 8. Impact on aesthetics, scenic beauty, historic sites, natural areas, wildlife habitat, or endangered species
 - 9. Conformity with local and regional capability and development plans impact on:

 - vi. Energy conservation
 - vii. Private utility services

For all other issues not addressed by Act 250, development projects shall be governed by and subject to the terms of this Zoning Ordinance including Development Review Board review and permitting process as defined herein.

- B. Land Development, construction, reconstruction and uses may be subject to other permitting as required by the State and Federal governments.

State permitting agencies include but are not limited to the Agency of Natural Resources, the Department of Labor and Industry, the Department of Health, the Agency of Human Services, the Agency of Transportation, the Agency of Agriculture, Food and markets, and the Department of Liquor Control.

The applicant is responsible for determining need for and obtaining any needed State or Federal required Permits. For more information on obtaining State and Federal Permits, contact the State Agency of Natural Resources Permitting Specialist.

The Development Review Board shall include in all decisions a statement of applicant responsibility for obtaining any needed State or Federal required Permits.

Section 229: Dimensional and Sign Waivers Granted by the Development Review Board

In the case of proposed development that does not meet the standards of this Ordinance. Waivers may be requested when seeking approval from the Developments Review Board. In applying for a Waiver, the burden of proof is on the Applicant to demonstrate that the Waiver request meets Waiver criteria in § 232 and § 233. The Development Review Board may require a survey to be completed at the owner's expense, if essential to verify the location of property lines.

In the event that a Waiver is granted, the Permittee must comply with all other requirements of this Ordinance.

Section 230: Structural Enlargements Not Requiring a Dimensional Waiver from the Development Review Board

Structural enlargements that do not increase the pre-existing degree of nonconformity do not require a Dimensional Waiver.

For example, if a house currently encroaches ten (10) feet into a setback and an attached porch encroaches fifteen (15) feet into the same setback, there is an existing nonconformity of 15 feet. The degree of nonconformity is measured from the greatest degree of nonconformity for that structure, or in this case 15 feet.

Additions that do not exceed the greatest current nonconformity would not be considered an increase in the degree of nonconformity. Using the same example; the porch with the 15-foot encroachment could be extended so long as it stays less than or equal to the 15 feet of nonconformity, or the 10-foot setback nonconformity of the house could be expanded another 5 feet, up to the 15-foot existing nonconformity, without increasing the degree of nonconformity. No Waiver would be required as the structure is not increasing the degree of nonconformity.

Section 231: Legal Nonconforming Structures, Uses, and Lots

For changes to Structures, Uses or Lots that do not conform to the current Zoning Ordinance but which complied with the Zoning Ordinance in existence at the time the Structure, Lot or Use was created, see Article IV § 430, 431, and 432.

Section 232: Criteria for Obtaining a Dimensional Waiver from the Development Review Board

The Development Review Board may grant a Waiver to dimensional requirements of this Zoning Ordinance, except to create a lot that does not meet applicable Zoning District requirements (unless part of a PUD) after making findings on the criteria below:

- A. The requested use of the property is reasonable and only possible if the Development Review Board grants a Waiver.
- B. The Waiver is the minimum reduction in the dimensional requirement that will enable the reasonable use of the property.
- C. The Waiver is for an addition to an existing Principal or Accessory Structure, and said addition does not increase the footprint of the building by more than five (5) percent, or by no more than two hundred (200) square feet, whichever is less.
- D. No front setback is reduced to less than two (2) feet (except in Historic Design Review District where it may be a zero (0) setback).
- E. The proposed project will still conform to the Town Plan and the purpose of the Zoning District in which the land development is located.
- F. The proposed project will not have an undue adverse effect on the following:
 1. The appropriate use or development of surrounding properties
 2. The character and aesthetics of the neighborhood, as defined by the purpose of the District in which it is located.
 3. Traffic patterns and circulation
 4. Public health, safety, and utility services
 5. Water and wastewater capacity
 6. The preservation of open space or scenic vistas
 7. The need for a Waiver was not intentionally self-created by past decisions of the applicant
 8. The Waiver does not create undue adverse impact on abutting or neighboring properties
 9. The Waiver is not to the detriment of public welfare, including the safety and maintenance of the Town and State highways.

Section 233: Criteria for Obtaining a Sign Waiver from the Development Review Board

The development Review Board may grant a Waiver to sign requirements if the sign is found to be in the public interest and will contribute to the character of the area and the community. (Refer to Article VIII § 850)

Waivers meeting these criteria may be granted by the Zoning Administrator if the Waiver is:

- A. For the minimum size necessary to serve its intended function.
- B. The Waiver is not to the detriment of the public welfare, including the safety and maintenance of the Town and State highways.

Section 234: Dimensional and Sign Waiver Application and Review Process of the Development Review Board

- A. An application to the Development Review Board for a Dimensional or Sign Waiver may be made as part of, and simultaneously with, an application for Conditional Use review or as a separate application if Conditional Use review is not otherwise required.

- B. Pursuant to 24 V.S.A. § 4460(e), the application shall come to the Development Review Board either as
 - 1. An application from the property owner
 - 2. An appeal of a decision made by the Zoning Administrator, or
 - 3. As a referral from the Zoning Administrator
- C. The application for a Waiver shall follow the same procedure used for Conditional Use review, approvals, and Appeals. (See Article II § 220-236)
- D. The development Review Board shall assess the impact on abutters in deciding whether to grant the Waiver, or to place conditions on the Waiver approval.
- E. In granting a decision in favor of the Applicant, the Development Review Board may attach reasonable conditions including mitigation by design, screening, or other remedy.
- F. Any Waiver granted under this Section shall be limited to the specific property to which it has been granted. A Waiver on one property shall not be construed as a general guideline or standard for any other property.
- G. Waiver approvals shall expire if work is not substantially completed within twenty-four (24) months from the date they are approved. All work shall be substantially completed as shown on any approved plan before the expiration date. The Zoning Administrator shall be notified upon completion of the work. The Development Review Board may grant an extension if an Application for an Extension is submitted prior to expiration of the Waiver.

Section 235: Variances Granted by the Development Review Board for Other than Renewable Energy Resources Structures

The Development Review Board shall hear and decide requests for Variances pursuant to 24 V.S.A. § 4469. The development Review Board shall grant a variance and render a decision in favor of the appellant only if all of the following facts are found and the findings are specified in its written decision:

- A. There are unique physical circumstances or conditions including irregularity, narrowness, or shallowness of lot size or shape, or exceptional topographical or other physical conditions peculiar to the particular property and that unnecessary hardship is due to these conditions and not the circumstances or conditions generally created by the provisions of these regulations in the neighborhood or District in which the property is located.
- B. Because of these physical circumstances or conditions, there is no possibility that the property can be developed in strict conformity with the provisions of these regulations and that the authorization of a Variance is necessary to enable the reasonable use of the property.
- C. Unnecessary hardship has not been created by the appellant
- D. The Variance, if authorized, will not alter the essential character of the neighborhood or District in which the property is located, substantially or permanently impair the appropriate use or development of adjacent property, reduce access to renewable energy resources, or be detrimental to the public welfare.
- E. The Variance, if authorized, will represent the minimum Variance that will afford relief and will represent the least deviation possible from these regulations and from the Town Plan.

Section 236: Variance Granted by the Development Review Board for Renewable Energy Resource Structures

The Development Review Board shall hear and decide requests for Variances pursuant to 24 V.S.A. § 4469. The Planning Commission reviews, interviews, and recommends to the Selectboard appointments to the position of Zoning Administrator. [24 V.S.A. 4448]

Section 261: The Role of the Selectboard in Appointing Planning Commission, Development Review Board, and Zoning Administrator

The Selectboard is the legislative body that appoints volunteers to their role on the Planning Commission and the Development Review Board. Appointments are generally for a three (3) year term, but this may vary based on special circumstances such as in filling the unexpired portion of a term of a previously filled position.

Section 262: The Role of the Selectboard in Adopting Changes to Zoning Ordinances and Town Plan

After the Planning Commission prepares, holds hearing on, and recommends changes to the Town Plan and Zoning Ordinance, they submit the new recommended Zoning Ordinance or Town Plan to the Selectboard. The Selectboard receives recommended changes to Zoning Ordinances from the Planning Commission (see § 251 of this Article). The Selectboard holds hearings on and makes all final determinations on Zoning Ordinance or Town Plan changes and adopts them.

Section 263: The Role of the Selectboard in Enacting Emergency Ordinance

In the event of an emergency, within 72 hours (3 days) the Selectboard can issue, to property owners of improved properties or the municipality, temporary authorization for projects to address immediate threat to life and/or property.

Within 24 hours all river and stream projects must be reported by the Selectboard to the Agency of Natural Resources through their online application form. Submission must include:

1. Site map (such as a town road map) circling the area impacted
2. Sketches of work to be completed including cross-sections and planforms
3. Description of all fill amounts and cuts for authorized activity which are limited to:

 - iv. River stabilization (armoring, bankfull width channels and flood plains)
 - v. Berming (discouraged, allowed only if absolutely essential)
4. Documentation that the project work meets the Agency of Natural Resources implementation standards as defined in the Vermont Rivers and Road Field Manual.

The Agency of Natural Resources will issue a temporary Permit after initial review. A final Permit can be issued after a more complete review. After receiving a State Permit, the Town would then seek FEMA authorization if applicable.

The Selectboard may delegate the authority for these approvals to an individual based on expertise and knowledge of relevant Vermont Regulations.
